Arthur Hughes

arthur.hughes@u-bordeaux.fr Linkedin Website

Education

2023 – 2026 **PhD in Biostatistics, University of Bordeaux, France**
Title: *Transcriptomic signatures for vaccine development: association, prediction, and surrogacy*

2022 – 2023 **MSc Public Health Data Science, University of Bordeaux, France**
Master thesis title: *Prediction of antibody response to Ebola vaccination with early gene expression.*

2018 – 2022 **MMath Master of Mathematics, University of Bath, United Kingdom**
Master thesis title: *Statistical Methods for Competing Risks Analysis.*

Research Publications

1. **A. Hughes**, R. Thiébaut, L. Parast, and B. P. Hejblum, *Meta-analysis of high-dimensional surrogate markers*, 2026. DOI: 10.48550/ARXIV.2605.03819

2. **A. Hughes**, L. Parast, R. Thiébaut, and B. P. Hejblum, "Rise: Two-stage rank-based identification of high-dimensional surrogate markers applied to vaccinology," *Statistics in Medicine*, vol. 44, no. 20–22, Sep. 2025, ISSN: 1097-0258. DOI: 10.1002/sim.70241

Skills

Languages English (native language) and French (professional working proficiency).

Coding R, Python, SQL, LaTeX, …

Misc. Statistics applied to complex biomedical data, multidisciplinary teaching and supervision, scientific presentation skills.

Teaching and Training

January - July 2026 **Co-supervision of Master Thesis** : *Evaluation of approaches for identifying high-dimensional individual-level surrogate markers applied to vaccinology* (Roaya Jannatipour)

January - July 2025 **Co-supervision of Master Thesis** : *Exploring gene expression as predictors, individual-level surrogates and trial-level surrogates of the antibody response to the trivalent influenza vaccine* (Théodora Georgakopoulou)

September 2024 - **Multidisciplinary teaching** : 30+ hours per year of teaching in the Public Health Data Science graduate program, University of Bordeaux, France. Courses on biostatistics, epidemiology, data science...
